

LAUREL HEALTH OFFERS EASY & CONVENIENT SCHOOL-BASED CARE

The **Laurel Health Centers** know that busy work schedules can make getting to a clinic challenging during the week. To reduce time away from work and the classroom, Laurel Health now offers a convenient **school-based care** program to treat illness and injury onsite. We encourage students to discuss health concerns with their family, and parents are invited to participate in school-based appointments by phone, video chat, or in person as their schedule permits. Rest assured, confidentiality is maintained between the student, parents, and the healthcare provider. **Our school-based services include:**

- Physicals and well child checks to clear students for sports / camp / school
- Mental health counseling and support
- Treatment for acute illness or injury (e.g., minor cuts, sprained ankles, cold/flu)
- Help with monitoring and treating chronic conditions (e.g., asthma, diabetes)

Parents / legal guardians can consent for their child to see **Annie Sumrall**, a **certified pediatric nurse practitioner**, and/or **licensed clinical social workers Kristina Mielke and Anne Anderegg**. Students can now see a provider right onsite then return to class (when appropriate). Your insurance will be billed as a regular office visit; if cost is a barrier to your child's care, please ask about our sliding fee program.

No immunizations or COVID-19 testing are offered at school, but parents are welcome to schedule vaccines, testing, or follow-up appointments at the nearby **Elkland Laurel Health Center**. If additional care is needed, Laurel Health has you covered with evening, early morning, and late afternoon appointments to better fit your schedule. Look for our school-based care forms and information packet with full details soon!

Annie Sumrall, CRNP

Kristina Mielke, LCSW

Anne Anderegg, LCSW
